Founded May 6, 2022

Members 15 members

- Services**
- Business development
Business collaboration between municipalities and private companies
 - Wagamama Lab (Capacity and DX human resources development)
 - Wagamama Machiya
 - Local Dialogue workshop etc.

Our Partners

Nippon Telegraph and Telephone East Corporation/
NEC Platforms Corporation/ NTTDX Partner Co., Ltd. /
Modis Co., Ltd. etc

Key factor 1

The population continues to decline by 2060, particularly the working-age population.

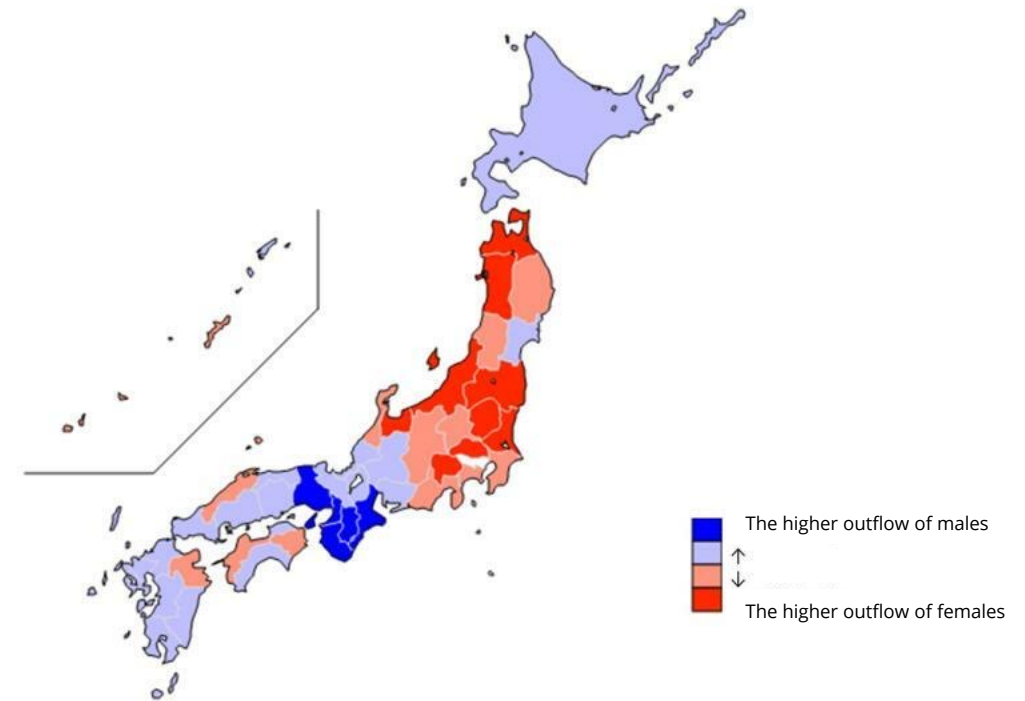

Key factor 2

More women from rural areas are moving to urban centers compared to men.

Population estimates by age group

The gender difference in the number of 20s outflow to Tokyo

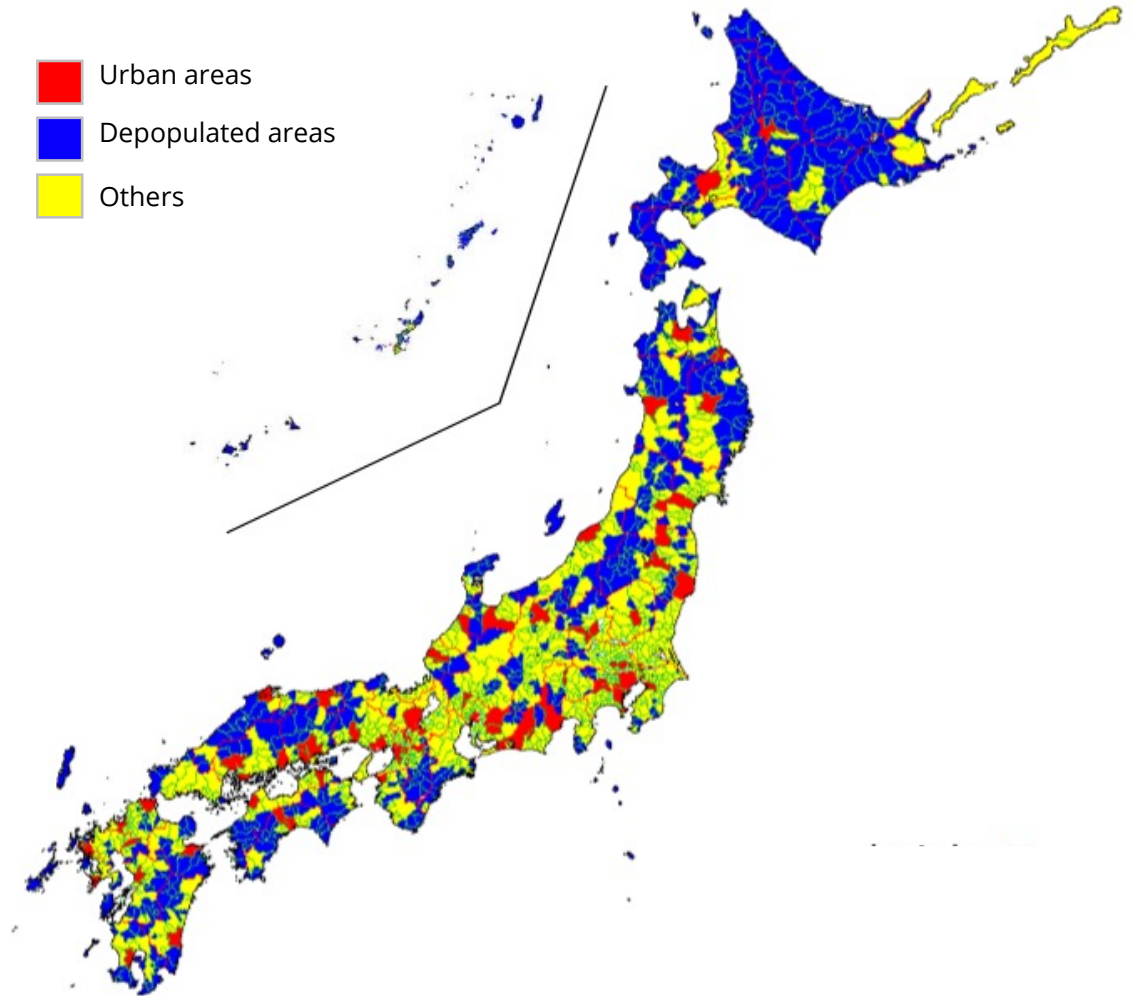

総務省「人口移動報告2022年」より、各都道府県の男女別人口に対する東京流出率の男女差分にて荒川和久作成。無断転載禁止。

資料：総務省「国勢調査」、国立社会保障・人口問題研究所「日本の将来推計人口」（平成29年推計）
(注) 1. 2016年以降は、将来推計人口は、出生中位（死亡中位）推計による。
2. 2015年までは総務省「国勢調査」（年齢不詳をあん分した人口）による。

Key factor 3

Depopulation in rural areas has significant consequences, primarily affecting economic and social aspects, creating a cycle of challenges.

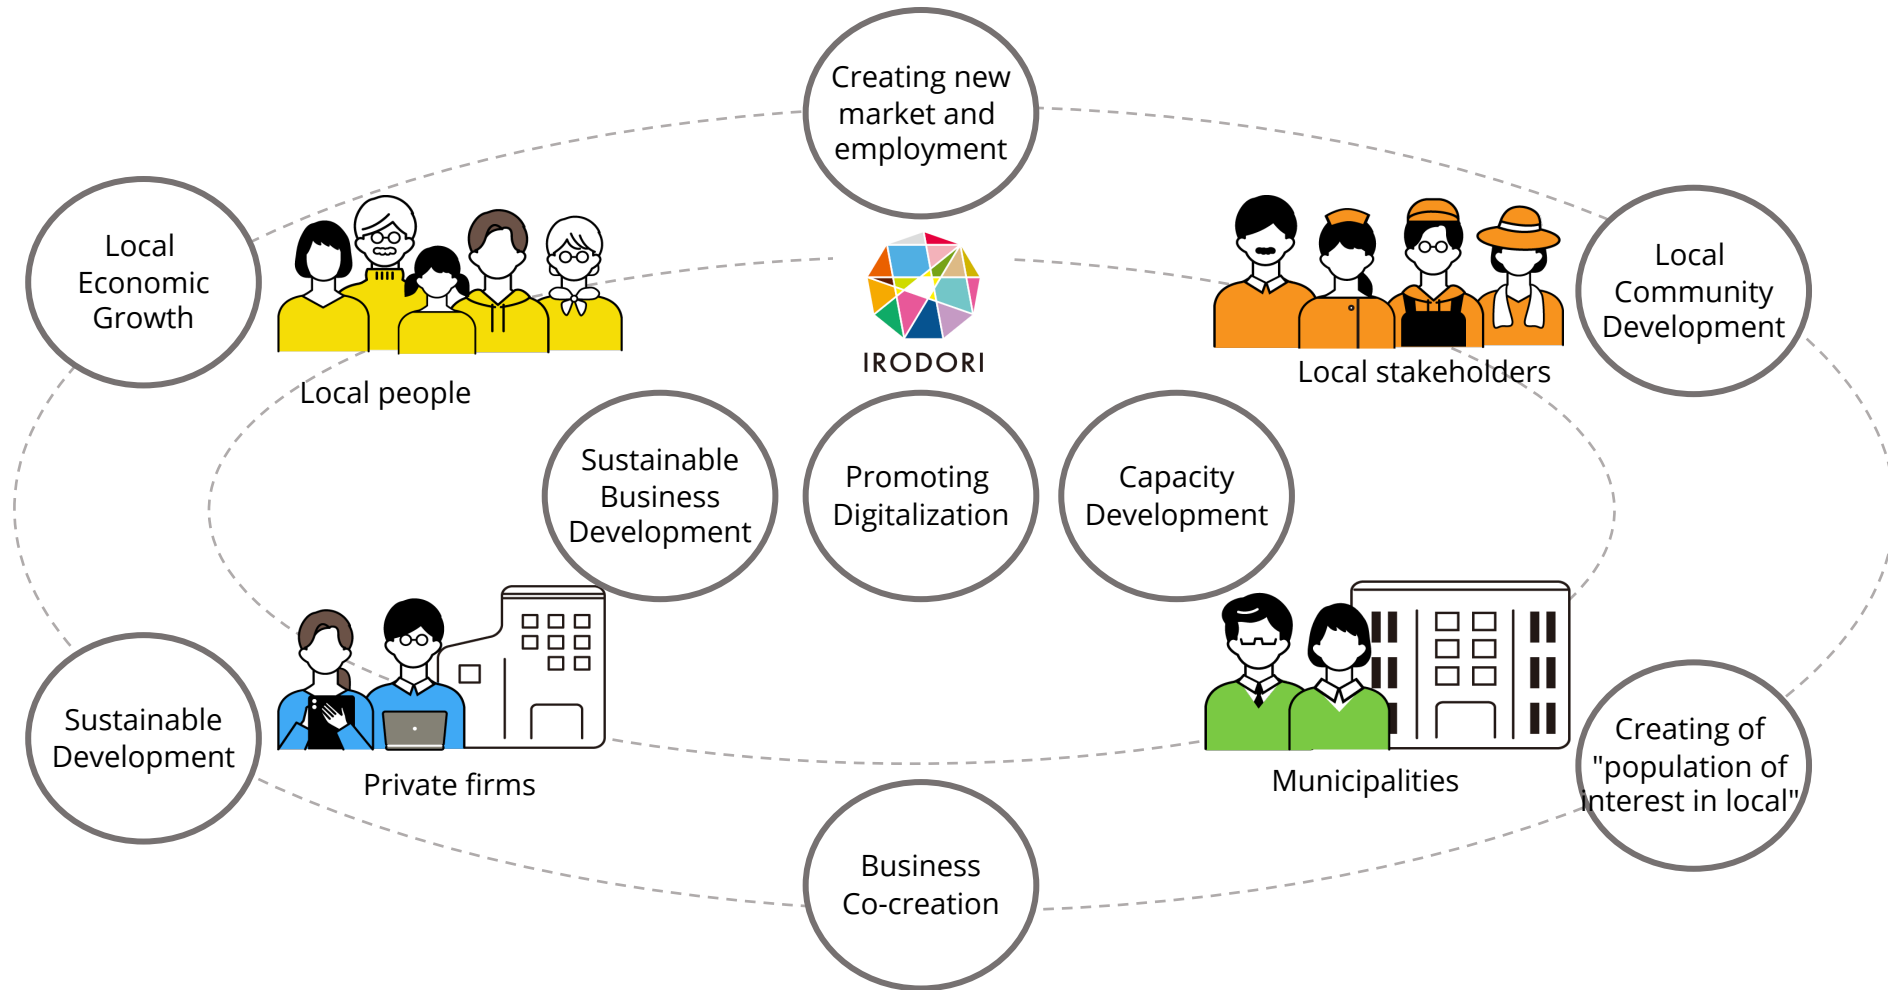

- The shortage of labor
- Leads to a decline in the number of attractive job opportunities
- Exacerbate the challenges of an aging society.
- Suffers the economic development of rural areas, leading to a decline in local businesses.
- Fall behind in digital transformation effort.

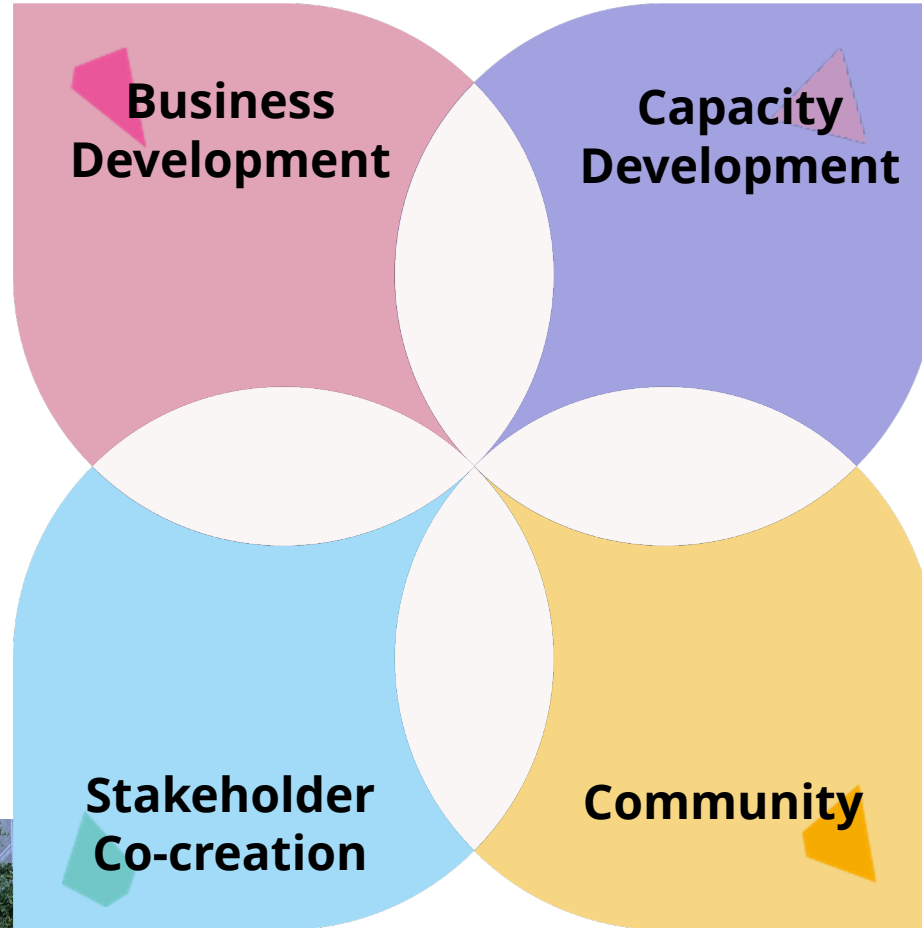

Our purpose and values

As a catalyst and intermediary for local economic development, we pursue to foster a supportive and diverse social system that empowers local developments and individuals in Japan.

Impacts for local society

Our services

- Business collaboration with municipalities and private firms
- Workshop used by Local Dialogue

- Support local intermediaries
- Support the “community-reactivating cooperator squad” as intermediaries
- DX human resource development

wagamama Lab

What is “Wagamama”?

Typical “Wagamama”

wagamama / wʌgə 'mɑ:mə / n.

A Japanese word similar to English ones such as selfish, self-centered, egotistic and so on. When someone act or say something without any consideration for others, we Japanese often say it “wagamama”. The word is mainly used in negative meanings, but they often use the word for just insistence or suggestion.

—ORIGIN

from Japanese,
from *waga* 'my own' + *mama* 'way'

Our “Wagamama”

Wagamama is —

Not your **selfishness**, but rather **your own little wish**.

Not only for yourself, but also for your close relatives.

Not only for a living around you, but also for your society.

Not only for your society, but also for societies worldwide.

Not only for the current world, but also for our descendants.

That’s Wagamama,

your own way leading to better society

What is Wagamama Lab?

Wagamama Lab is an innovation platform with a human-centred, problem-solving approach to innovation to solve local issues.

Our Purpose

Empower people and organizations to address local problem-solving and foster supportive and diverse environments in local areas.

Our Values

1. Enhance people's capability, leveraging resources through design and mobile computational thinking.
2. Enable people to identify local issues and address problem-solving and innovation, involving local stakeholders.
3. Support organizations such as intermediaries and build social ecosystems collaborating with municipalities.

1

The half of youth don't believe that their own action can change society

54% of Japanese youth don't believe they can change their country or society, ranking lowest globally in future aspirations.

2

Working age population desire to return to rural areas

49.8% of urban residents aged 20-50 express a desire to live in rural areas, hindered mainly by job opportunities and local culture.

3

Increase demands for digital education programs at schools

DX High School initiatives refer to high schools that focus on digital technology and information technology. In these schools, students acquire digital skills and knowledge related to computer science.

Appendix: Awareness Survey of 18-year-olds Country and Society

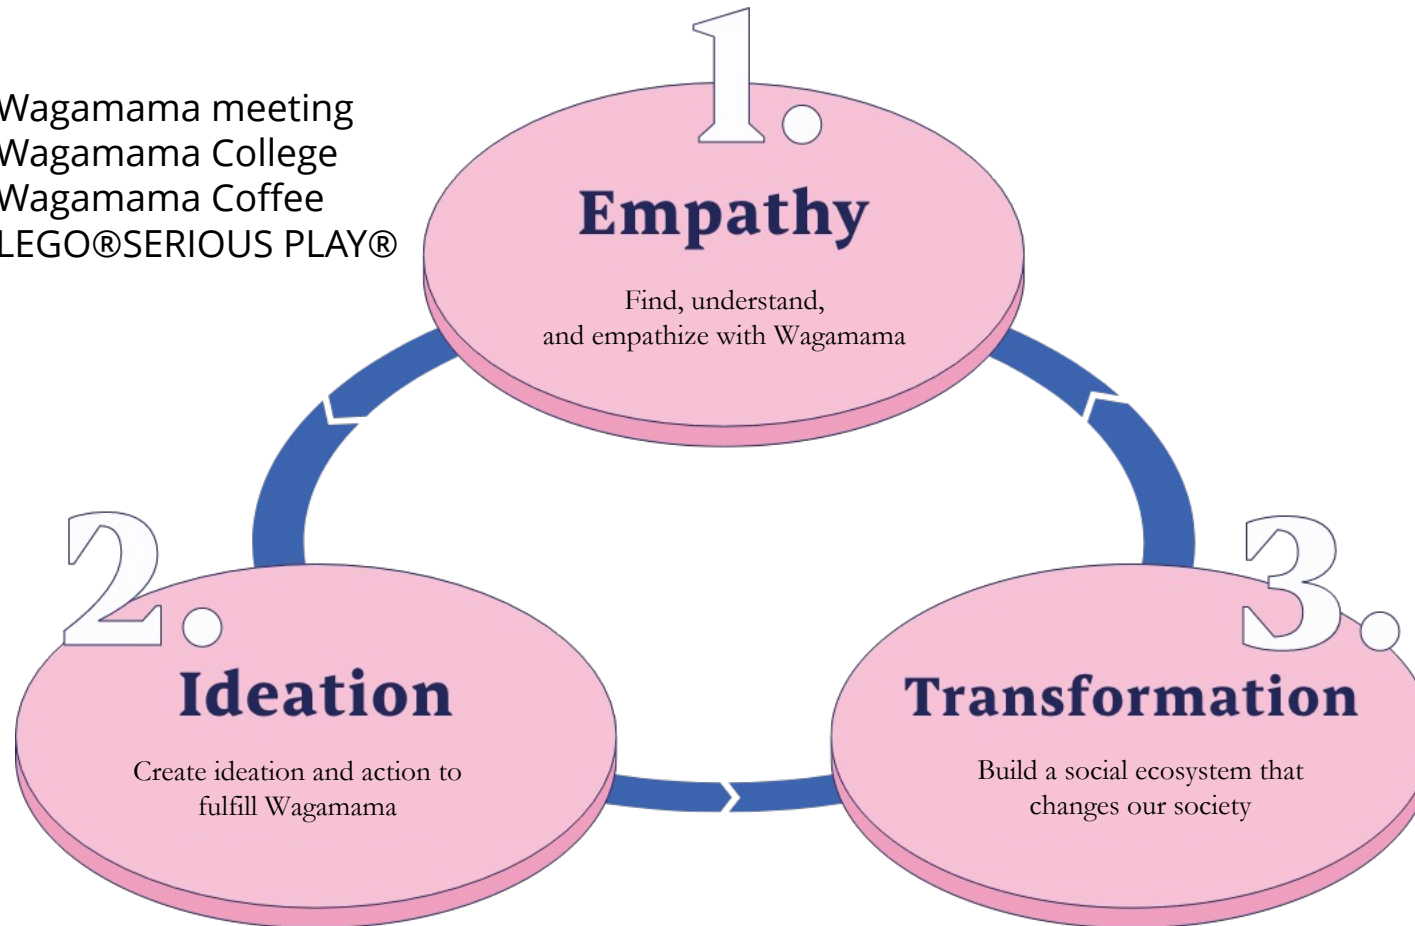

The results indicated low feelings of self-esteem and self-efficacy among Japanese respondents, with 46% replying that “I believe my own actions can change my country and society”.

	Japan	United States	United Kingdom	China	South Korea	India
I would like to be useful to my country and society	64.3	78.4	77.7	93.6	71.1	85.9
I am a responsible member of society	61.1	79.4	80.7	92.1	74.5	86.8
I would like to participate in volunteer activities	60.4	76.3	68.6	89.8	70.5	79.2
I would like to participate in charitable activities	58.4	78.4	79.5	87.2	66.6	84.4
I consider myself to be an adult	49.6	76.6	75.8	90.0	54.8	81.7
I believe my own actions can change my country and society	45.8	65.6	56.1	83.7	60.8	80.6

Kuwana city, Mie prefecture

Local problem-solving programs for elementary, junior high school students and their parents

A major issue in Kuwana city is that it is difficult for young people to return to their hometowns after leaving for urban areas because of a lack of choices in various jobs. Through developing smartphone applications to learn about local issues, participants could experience that have potential options to return to their hometowns and work there after they acquire digital skills.

Hokota city, Ibaraki prefecture

Local problem-solving and digital human resources development programs for high school and university students

Hokota City boasts the highest vegetable production in Japan. However, young people don't have enough choices for employment except for farms or organizations in agriculture. This project's goal is to provide opportunities for young people to acquire digital skills. This can make them realize that they can continue living in their hometown by developing these skills.

Sukagawa city, Fukushima prefecture

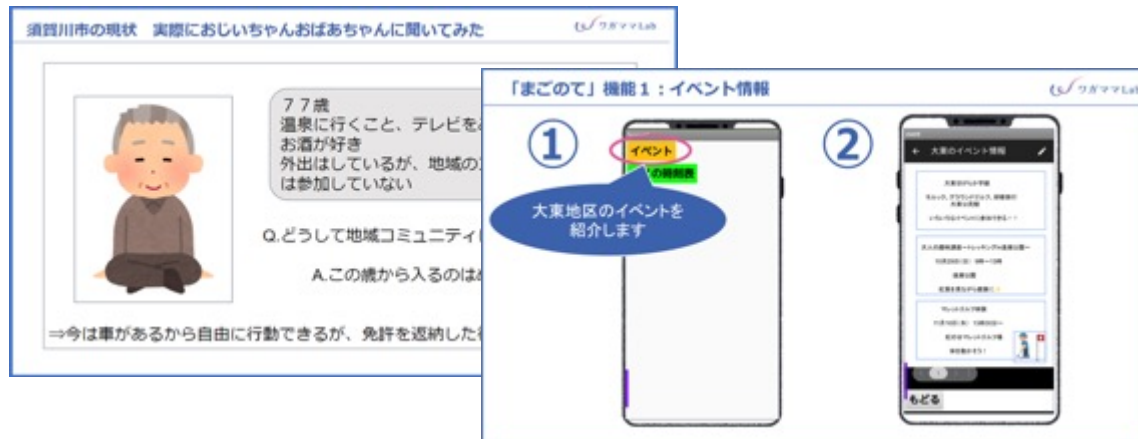

Developing digital human resources for junior high school and high school students

This project encourages junior high school and high school students to tackle local challenges by developing smartphone applications to solve them. For these students, resolving local issues contributes to enhancing their engagement in Sukagawa and cultivating local issues facilitates the return of people who left the area (UI-turn) back to their hometowns.

Addressing family /other relationship-centered problems

- An app for mothers to pick up and drop off children to ease the mothers' burden
- An app for a grandparent to make new friends.
- An app for grandparents to learn about local events that they're interested in and participate in them.
- An app to find friends and cohorts with similar aspirations.
- An app for grandparents to solve transportation issues.
- An app to help friends studying for exams.
- An app for students living away from home to communicate with their grandparents.

etc

Addressing Local business problems

- An app for farmers interested in smart agriculture to access information about subsidies.
- An app for cabbage farmers to match job sites with students to address labor shortages.
- An app for parents to find out about children's programming classes
- An app for local shops to set appropriate pricing.
- An app for first-time visitors to enjoy hot spring spots.
- An app for elderly people to report wildlife damage.

etc

Case Example: Tomoka from Hokota Wagamama Lab

Profile

- Tomoka Nogami
- Born in Hokota City
- 2nd year high school student

App Overview

• For Whom

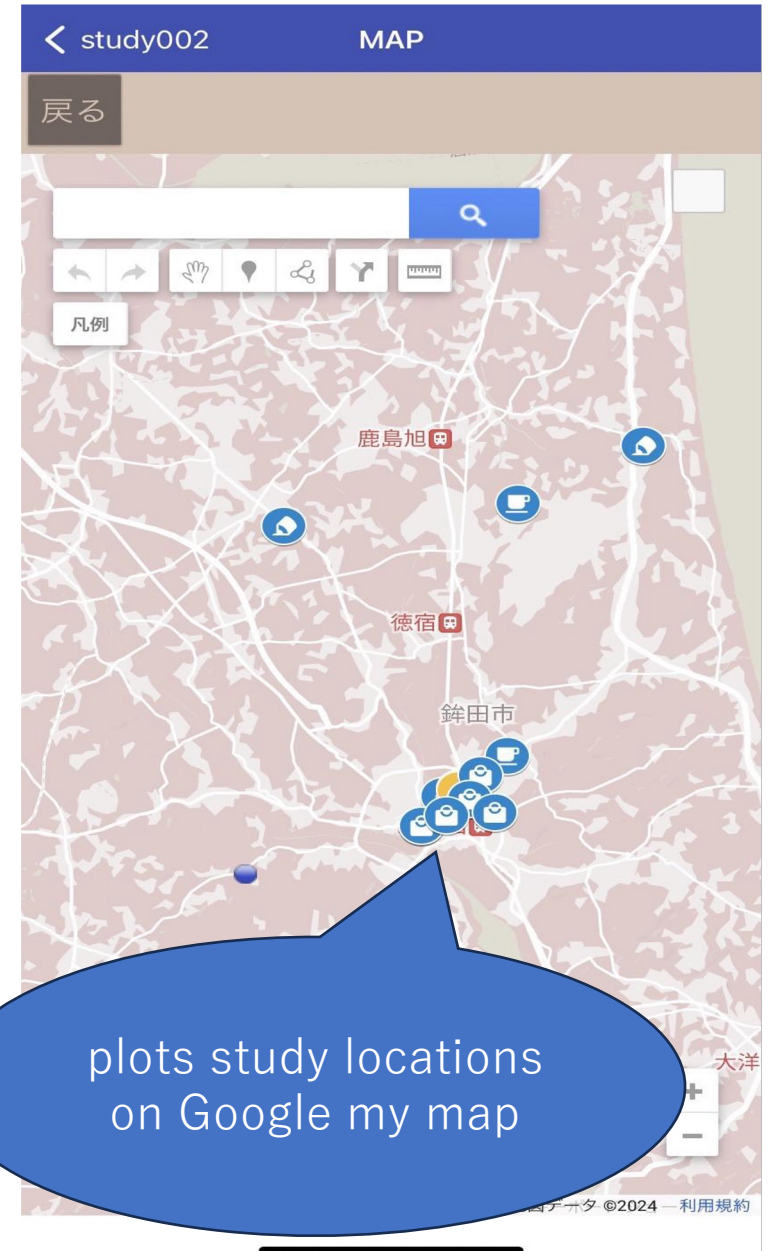

A childhood friend who is preparing for university and has no place to study where she can concentrate.

• What Challenges :

Struggles to study effectively due to the lack of places to concentrate and study

• Main Functions

- Map description and information
- Links to YouTube
- Stopwatch function
- Random display of photos

Transformation

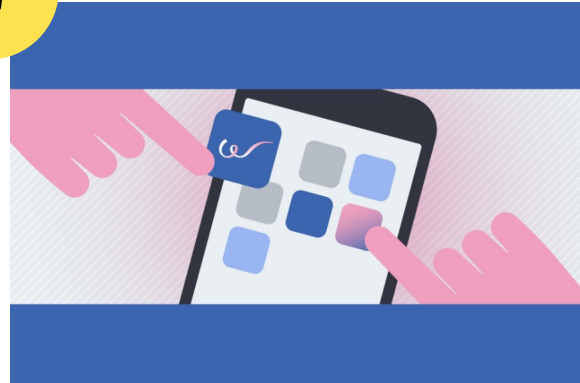

1

Expand the Educational Programs

We will commit to broadening our educational initiatives, including Wagamama College (MIT App Inventor Training Program), DX High School initiatives, and tutoring schools for young students.

2

Implement Wagamama Lab in all prefectures across Japan

This expansion effort aims to democratize access to innovative educational opportunities, ensuring that individuals from diverse regions have the resources and support to enhance their digital literacy and problem-solving skills.

3

Build the Platform and Ecosystem

We are dedicated to creating a supportive platform that fosters ongoing communication, motivation, and collaboration among program participants.

Wagamama Lab: Future Plans and Milestones

Wagamama Lab

Implement Wagamama Lab in 10 prefectures

Currently, we committed 4 projects in 5 prefectures.

Collaborate with trainers

We will move forward to expand Wagamama Lab across Japan with trainers.

Share and Inspire with the World

We will share real-world challenges from Japan with the global community to inspire collaboration and innovation.

Achieve the implementation in 30 prefectures!

Achieve the implementation all prefectures (47) across Japan!

2024

2025

2026

2027

2028

Achieve 400 individuals Training Program!

Achieve 1000 individuals Training Program!

Start MIT App Inventor Training Program

Train 100 members. (9 members are already engaged, and 12 members are scheduled to participate).

Start workshop by trainers

The members can start their own workshops by MIT App Inventor.

Build the platform

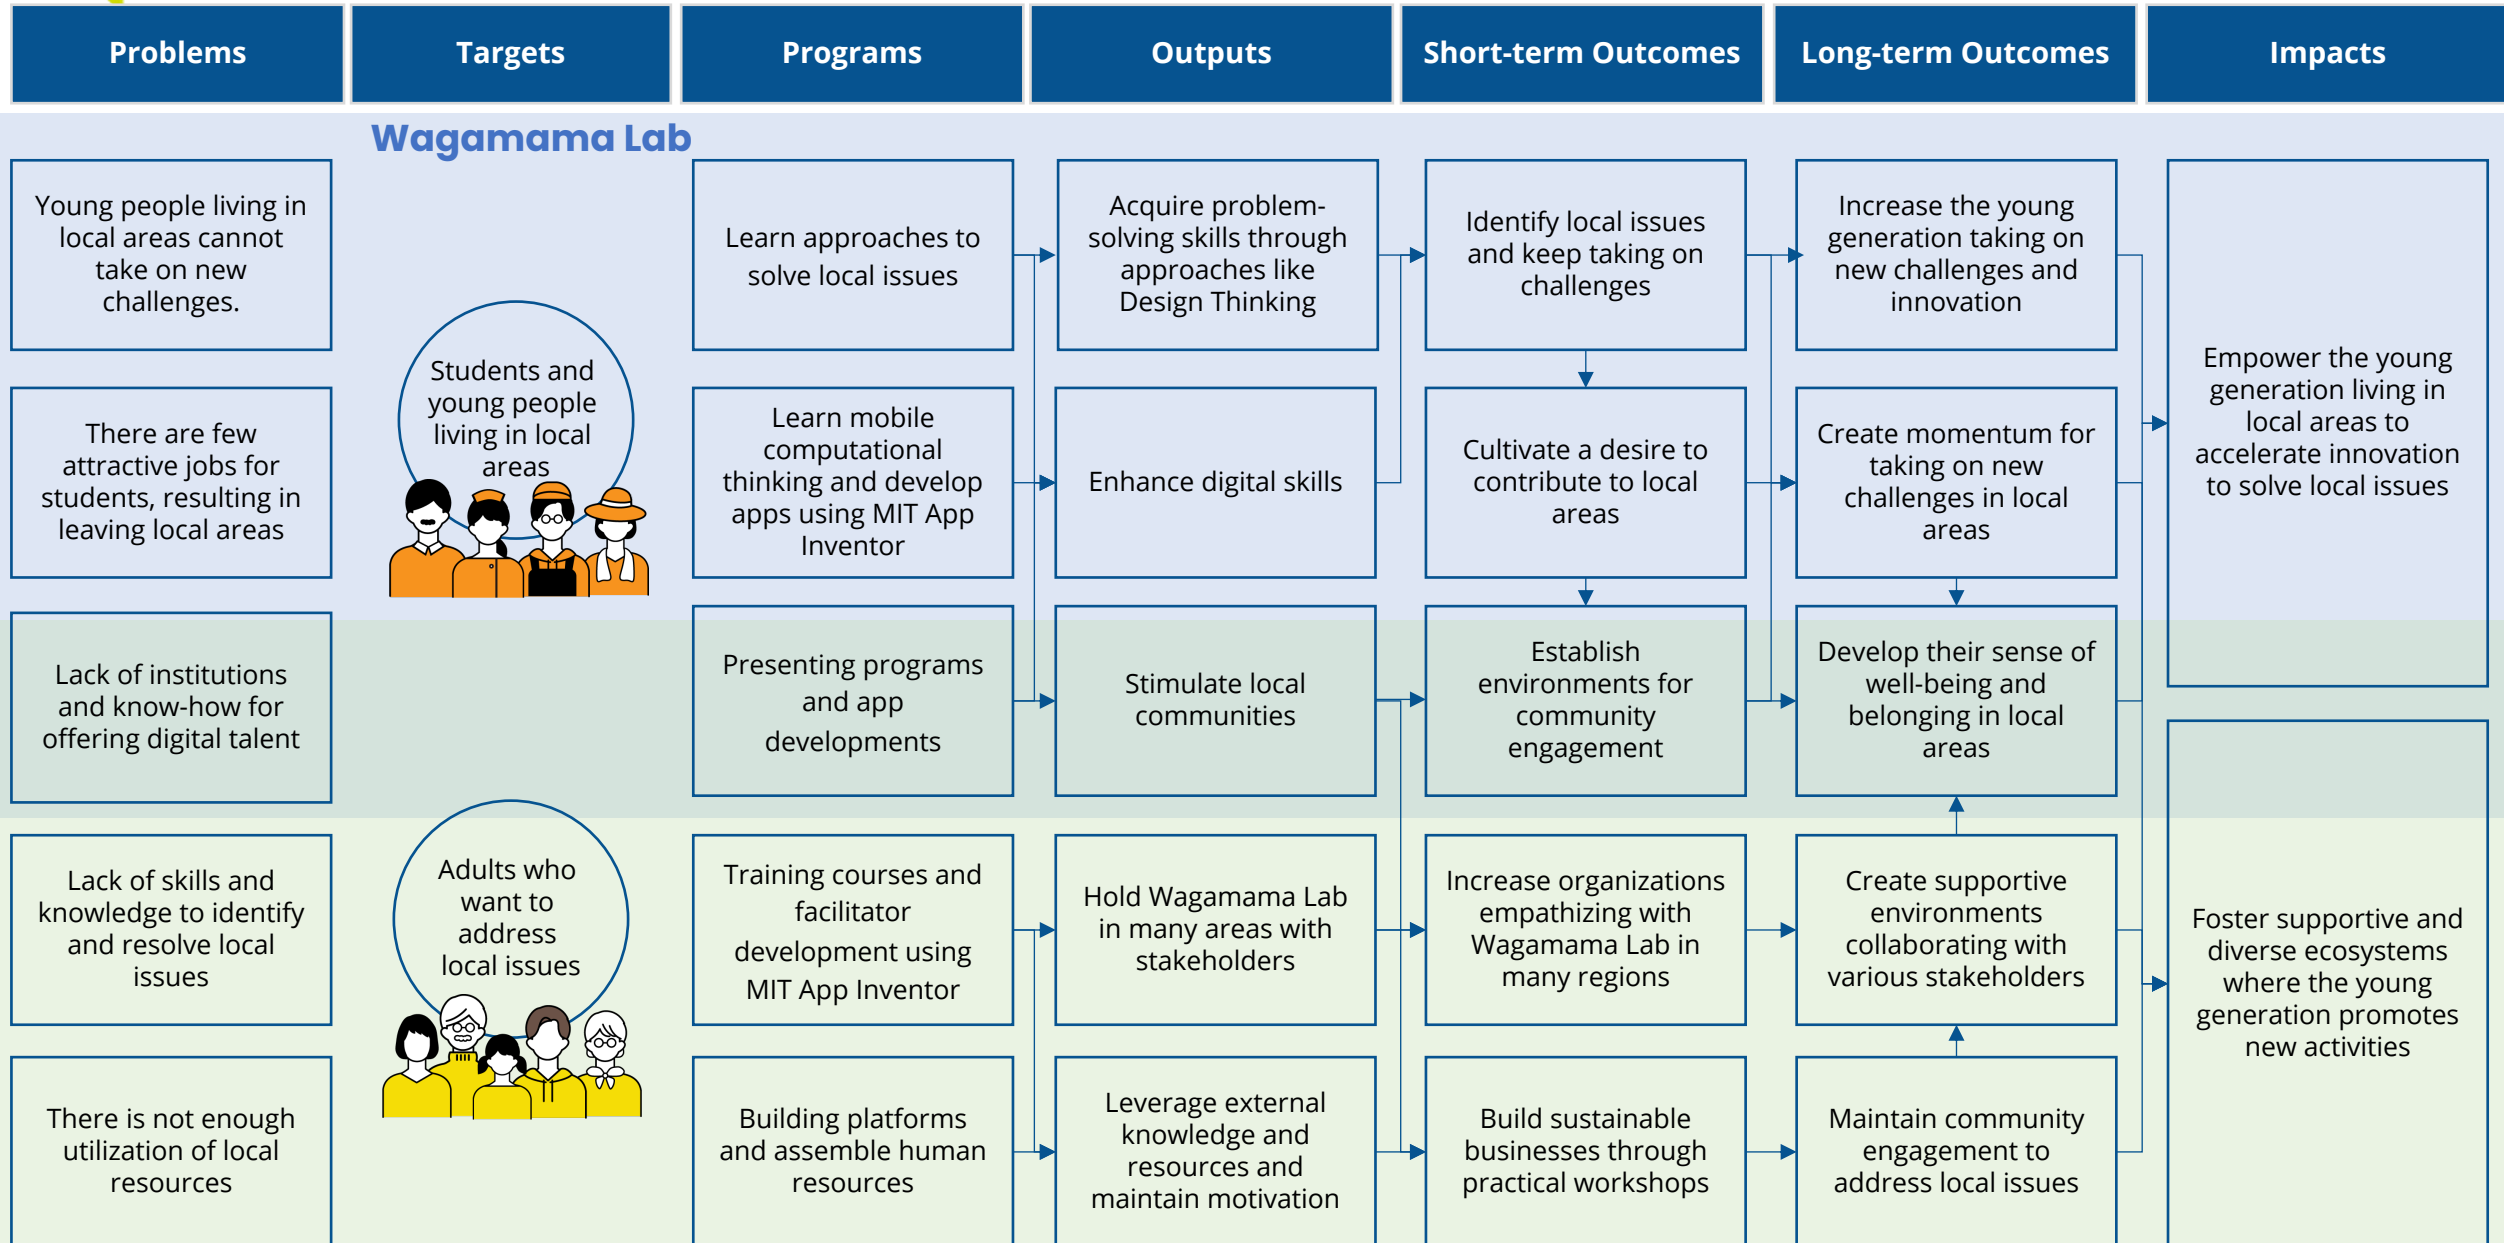

The trainers can foster communication, motivation, and collaboration through the platform.

Increase workshops by trainers and create ecosystems

The trainers can contribute to local challenges through MIT App Inventor workshop. Also, they can collaborate on projects with local stakeholders such as municipalities and private firms.

Wagamama College Program

Wagamama Lab: Theory of Change

Wagamama College Program

1. Collaboration with Wagamama College and DX High School initiatives

- Enhance and involve these programs' contents and activities.

2. Japan Wagamama Awards 2024

- Collaborate to assist in program development and technical support.

3. Technical support for IRODORI members

- Support our members to improve their skills, knowledge and expertise.

4. Sharing and Feedback

- Japanese case studies
- Japanese application version
- iOS (iPhone) market in Japan
